Self-Cleaning
Motor Blower

PN 260481 For 400HP TDS11 Rotary Table Motor Blower, 5HP UL listed "XP" motor, 460V, stainless steel

Gulf Electroquip **DOUBLE CLEAN™** PATENTED Self-Cleaning Motor Blower Design

PATENTED Self-Clean Drilling Motor Blower US Patent No. 6,648,935 DNV Certified Design

DOUBLE CLEAN™ mechanically filters out sand, dirt, moisture and other abrasive contaminants for longer motor life. Double Clean lowers the contamination inside the drilling motor, yields greater reliability, longer time between rebuilds, which reduces downtime for the rig. Using a patented "element-less" filtration method, Double Clean cleans the air while pushing air through the blower. This requires less maintenance than standard filtration models, and no more maintenance than a standard non-filtered blower. The filtered contamination is expelled through two (2) cleaning cycle exit ports on the side of the blower (See chart to right).

HOW IT WORKS

Specifications subject to change without notice. Contact your Gulf Electroquip representative for specific information about your specific application of Gulf Electroquip products.
